One-Touch Clamps Evolution!

One-Touch Clamp Stable Lock Series

One-Touch Clamps are mechanical quick clamps that feature quick and easy clamping with no tools. This highly popular product now welcomes the new "Stable Lock" Series!

What's new! Stable Lock One-Touch Clamps

1 Updated Rigid Clamping Mechanism

Provides mechanical positive clamping with a ball and tapered surface with spring force.

2 Stable & Constant Clamping Force

Clamping force is constant and strong no matter who is on the job.

3 Clear Clamping Completion

Now feature a click at the clamping end to ensure reliable operation.

4 Operation by Robots

Reliable & easy clamping also allows robotic operation.
